*Breakout-Box / CAT5E - XLR*

*Price: SFr. 145.00*

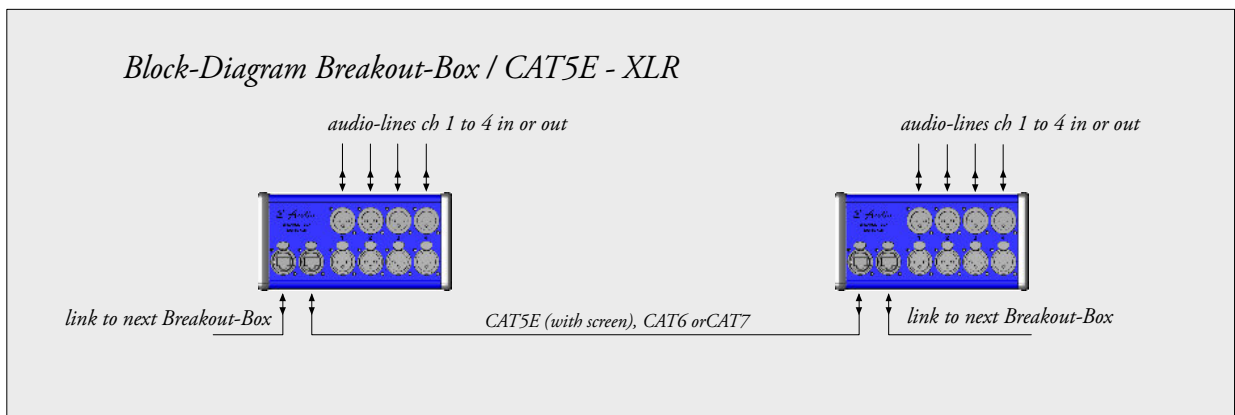

## Breakout-Box / CAT5E - XLR

If there is some need for analog audio-lines a free CAT5E, CAT6E or CAT7-Cable can be used with two CAT5E-XLR breakout-boxes to feed 4 analog lines over a CAT5E, CAT6E or CAT7 cable.

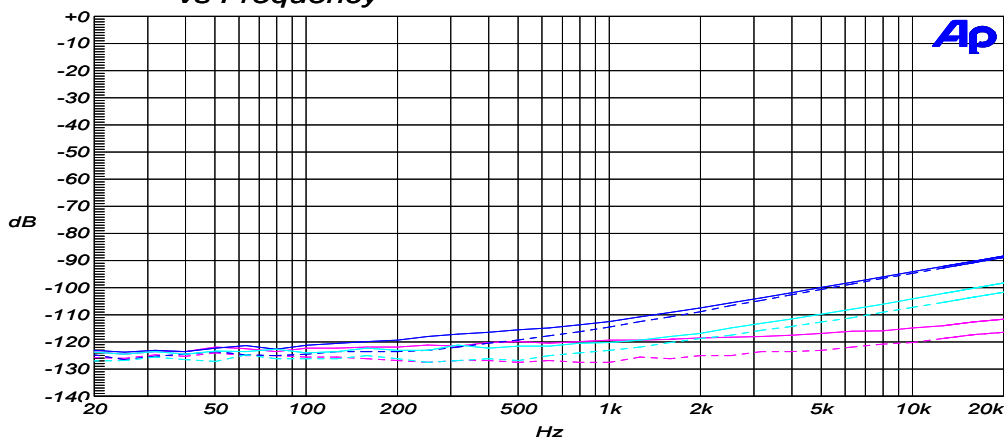

Attention: No switches nor network-ports are allowed in this signal-path! - It needs a straight 1:1 cable-connection!!

Each box is equipped with two linked Cat5 connectors and 4 pairs of linked female & male XLR-connectors for 4 audio lines (audio in or out).
